ONLINE GENERAL PLAN FOR SAN RAMON, CA

Public accessibility and Web Content Accessibility Guidelines (WCAG) compliance for plan and regulatory documents have recently become major points of concern for local planners in California. As leadership in San Ramon looked to move their Municipal Code and Zoning Ordinance into a more interactive and easy-to-update format, they realized the same could be done for their 2035 General Plan.

The scope of this project included a complete conversion of their 400- page General Plan document to the enCodePlus cloud publishing software, design and development of a General Plan landing page hub to allow for quick navigation of the plan document, and creation of a Climate Action Plan (CAP) tag used to gather all CAP-related policies in one place.

“Everyone is so excited and they love how it looks. Great work, enCodePlus.”

- Naomi Yun, Paralegal | Office of the City Attorney | City of San Ramon
