**EMPOWERING COMMUNITIES: STREAMLINING ACCESS TO PLANNING AND DEVELOPMENT IN BUTTE COUNTY, CA**

Butte County contains over 1,500 square miles of mountains, foothills, and riverland in northern California. Since much of the population is distributed throughout the area in smaller, rural communities, County staff recognized a need to provide their citizens with easier access to a variety of planning and development documents.

The project began in 2022 with the conversion of the County's General Plan 2030 into the enCodePlus software system. Since then, we have added:

- General Plan 2040
- Zoning Ordinance
- Subdivision Ordinance
- Climate Action Plan, and
- Upper Ridge Community Plan

Future goals include the implementation of a landing page that will allow citizens to explore highlights of the individual documents and easily browse among multiple sources for the information they need, all from one location.

An enCodePlus landing page allows users to browse information from multiple planning documents without ever opening those documents.
