PRINCE GEORGE'S COUNTY LAUNCHES NEW DEVELOPMENT CODE IN AN INTERACTIVE FORMAT

In early 2022, Prince George's County (PGC) teamed up with enCodePlus (ECP) to host and manage their newly adopted development documents. PGC was looking for a way to make their development regulations come to life in a format that could capture these vital documents' design and layout intricacies. The staff at PGC also wanted to bring in the former development regulations so they could be used for historical research using the ECP native search function. Hosted documents include:

- Subtitle 24, Subdivision Regulations
- Subtitle 27, Zoning Ordinances
- PGC's Landscape Manual
- Former Subtitle 24, Subdivision Regulations
- Former Subtitle 27, Zoning Ordinances
- PGC's Former Landscape Manual

Zoning, parcel, and dimensional standards are all combined in one view that is shareable and exportable, optimizing the user experience and making this information simple to share and review offline. This interactive GIS mapping tool was specifically designed for the County.

The former documents are also hosted in ECP and stored on a linked archive site! They are fully searchable and exportable!
